Before

After

Rösler Relining

a noticeable difference

Rosler keeps your mass finishing bowls up and running

Rosler's Lining Division, located in Marshall, Michigan, is one of the largest suppliers of wear-resistant polyurethane linings in the industry.

For 30 years, we have been relining and refurbishing vibratory finishing equipment. We use highly wear resistant cold-pour, hot-pour and spray-in mercury-free polyurethane, in hardnesses of 80, 90 and 95 durometers, to ensure that your finishing machines can take what you dish out.

Our factory-trained, US-based repair technicians will ensure that your machines are in like-new condition and ready to work hard for you, regardless of manufacturer or model.

Part of the Total Process Solution

At Rosler, our focus is on *finding a better way...* Relining and refurbishing is an important part of our Total Process Solution, which also includes:

- ▶ Process Analysis and Development
- ▶ Mass Finishing and Shot Blasting Equipment
- ▶ Consumables
- ▶ System Configuration
- ▶ Waste Water Treatment
- ▶ After-Sales Service

We can line your bowl, guaranteed!

We stock hundreds of lining molds, to provide a perfect fit for a wide variety of equipment made by all major North American manufacturers.

No mold? No problem. If we don't have a mold to fit your machine, we will provide a custom lining made from spray in polyurethane.

Mending is better than ending

We can help you control costs by making your old machines new again, with a complete overhaul, including the vibratory drive and separation system to ensure that they meet or exceed the manufacturers original specifications. We can also retrofit your machines in the event of a change in the way your parts are processed.

We also offer a wide variety of other services to keep your mass finishing operation working at full capacity, including:

- ▶ Polyurethane patch kits
- ▶ Separator screens
- ▶ Metal fabrication
- ▶ Welding, machining, heat treating and grit blasting
- ▶ Factory-trained, US-based, field-service technicians
- ▶ Spare parts
